Make The Plain Room Attractive

WHETHER building or remodeling, you will be better pleased with your rooms if stiff-as-lumber Black Rock Wallboard is used for the walls and ceilings.

There is no muss or litter in applying Black Rock Wallboard. Once in place, it stays there permanently without cracking, warping or falling. It gives an added comfort and attractiveness to the rooms no matter what the character of the building—house, bungalow, office, store, restaurant, church or factory.

Note the moisture-repellent black centre that identifies the genuine, rigid, 4-ply veneer Black Rock Wallboard. Black Rock Wallboard is protected against all kinds of weather and needs no priming coat in decorating because it receives a special surface sealing and sizing treatment.

Give us a chance to explain the advantages of Black Rock Wallboard for your particular buildings.
